Anaconda is a distribution of the Python and R programming languages for scientific computing which aims to simplify package management and deployment. The distribution includes data-science packages suitable for Windows, Linux, and macOS. It is developed and maintained by Anaconda, which was founded by Peter Wang and Travis Oliphant in 2012. As an Anaconda, it is also known as Anaconda Distribution or Anaconda Individual Edition, while other products from the company are Anaconda Team Edition and Anaconda Enterprise Edition, both of which are not free.

STEPS TO INSTALL ANACONDA

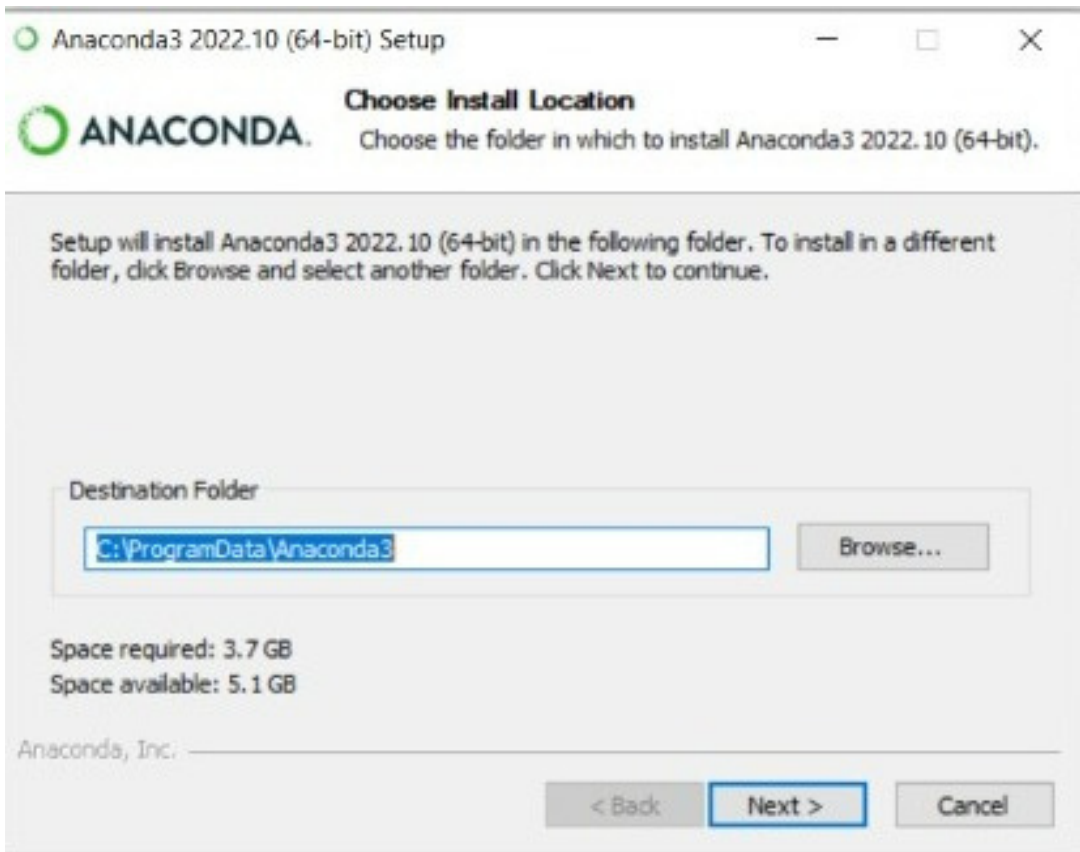

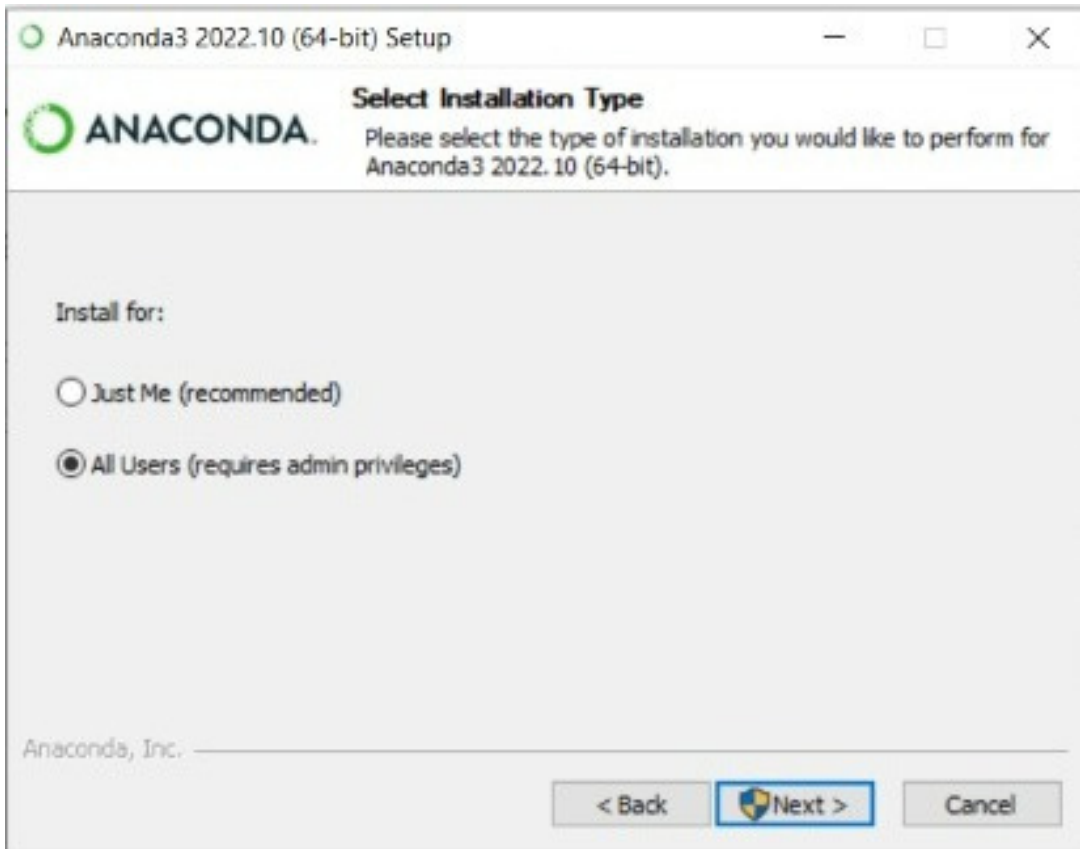

STEP 1: Download the Anaconda installer.

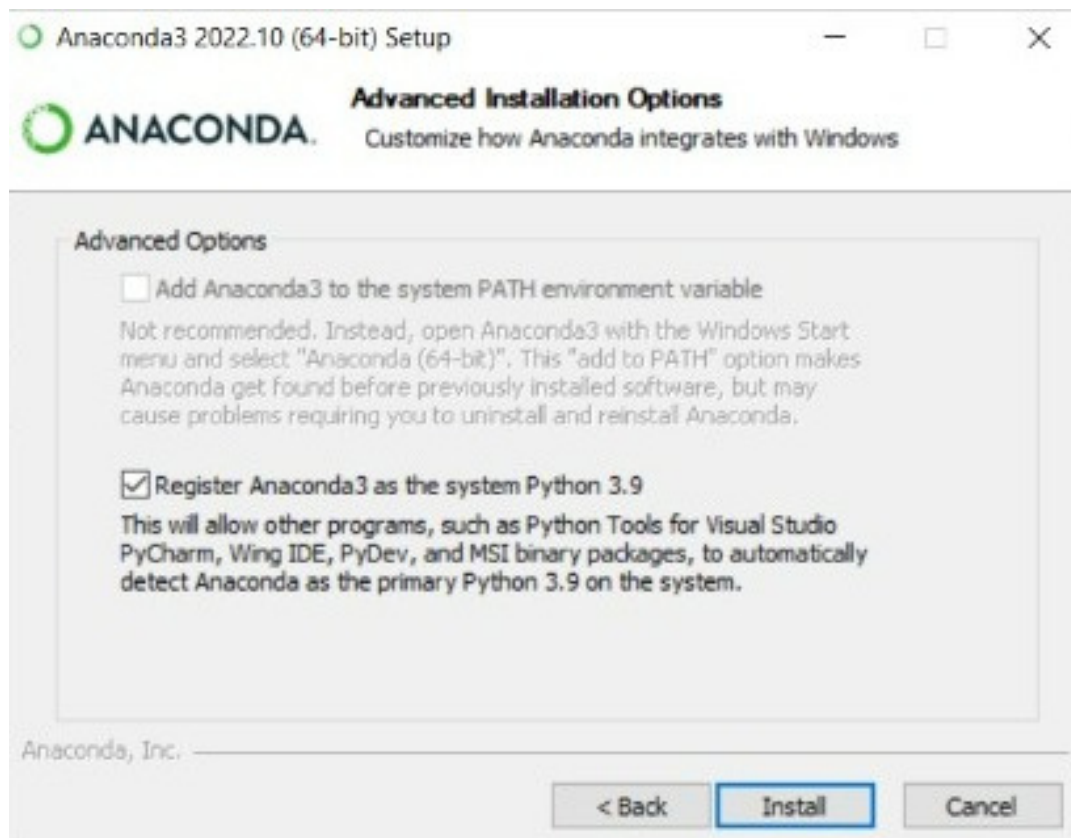

STEP 2: Double click to launch and click next. After reading the license agreement, click I agree.

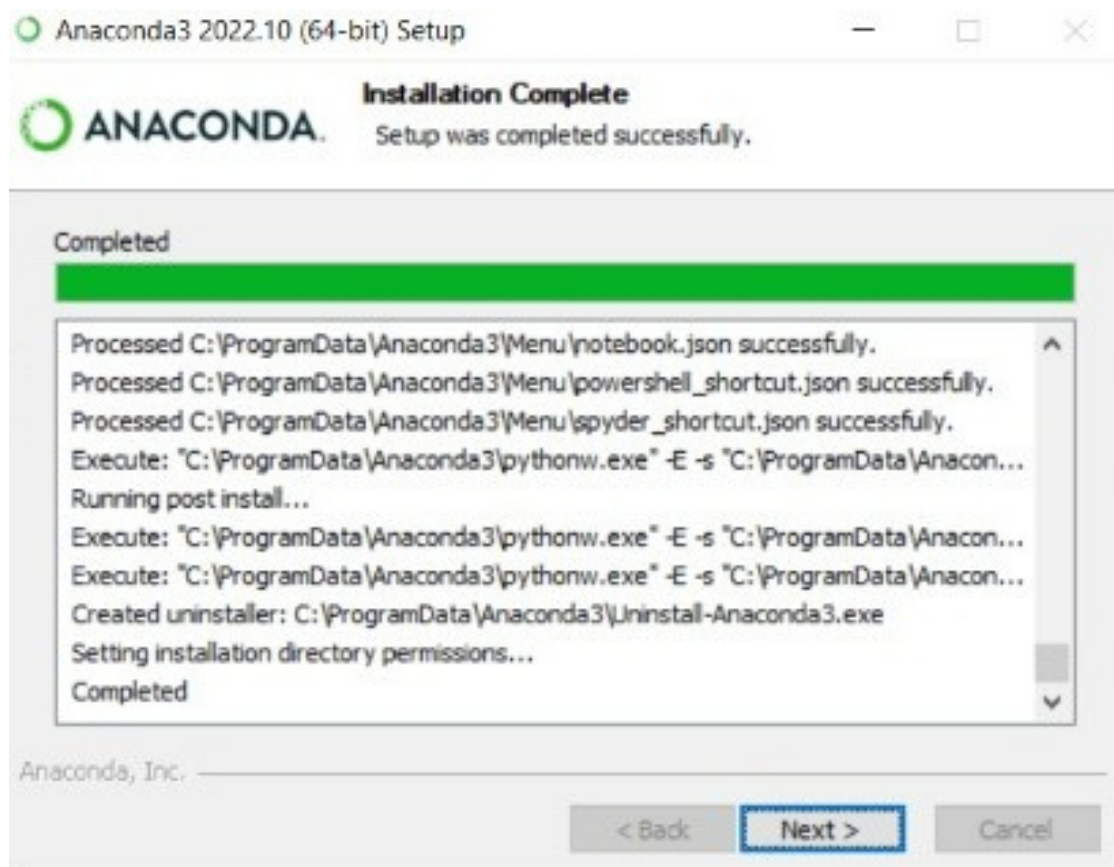

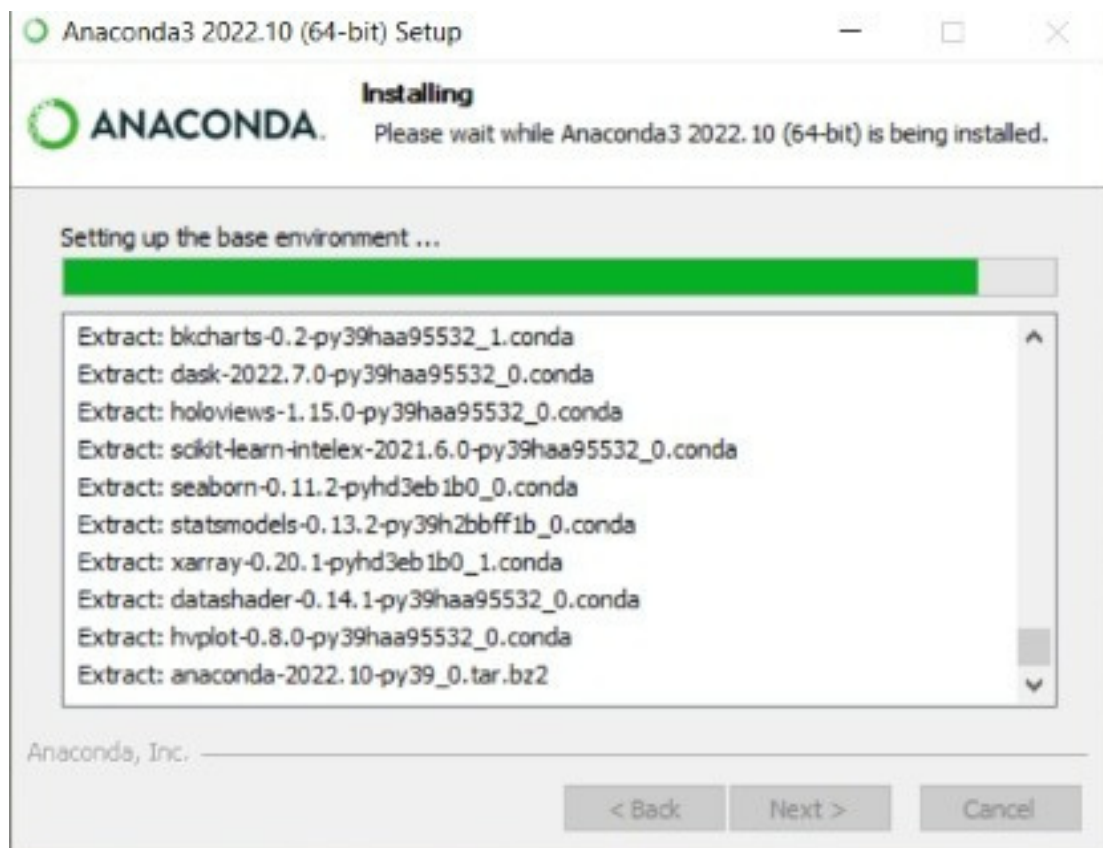

STEP 3: Select the installation type and installation location then click install.

STEP 4: After clicking install , the packages will be installed then click on finish to proceed .

STEP 5: Check the functioning of the anaconda navigator after successful installation of anaconda .
